

Information :-

The meaningful result of processed data is called information by the help of which we can make decisions.

Characteristics of computer:

① Speed: Computer is the fastest device & can perform various task at very fast.

1 sec = 1000 milli-second

1 milli sec. = 1000 micro sec.

1 micro sec. = 1000 nano sec.

1 nano sec. = 1000 pico sec.

② Accuracy: The word accuracy means correctness of any particular result. A computer can never misguide a user in any result unless & until user give incorrect data.

③ Diligence: A computer never suffers stress or tiredness hence can work for hours without creating any error.

④ Storage: It is the most important feature. Computer can store large amount of data & can retrieve it when & where required very easily unlike human can not do it.
